

WorkMentor

Leonardo da Vinci – Transfer of Innovation

Workmentor Project.

Leonardo da Vinci

Piloting Phase: short reports from partners.

During Partner meeting 4 in Ekenäs / Tammisaari in Finland, each partner is asked to give a short report, preferably as a slide show. 10 – 15 minutes per partner.

These are the issues to address for each partner. Please adjust to your format of piloting.

- The format: workshops (dates) or / and individual sessions, how were these implemented?
- Place for workshops/meetings. Where, which kind of facilities?
- List of materials, documents used etc. Attach the materials (slides or other materials) used = bring to Finland.
- Instructors (the people) hosting the workshop/piloting sessions.
- Participants (future mentors) both number of people and from which workplaces.
- Did the mentors have any students working with them now / this winter? How many of the mentors had that, perhaps all with some partners, perhaps some of the mentors but not all with some partners.
- General experience of the piloting judged from the trainers' point of view. Something that should be done otherwise? Did something go wrong? Need to change something?
- Can the partners say they are prepared to host another workshop on mentoring in the workplace?
- Outcome from the survey about the mentoring - contact Tanja.

Finally a general evaluation on the piloting phase.

If the institution was doing this the first time, how was this?

If this is a repeated experience, was there anything different now using the Workmentor materials selected?

Need to change the workshop and the materials?

Please bring a normal slideshow ppt and a PDF format.
